DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Page 6 of Applicants' remarks filed December 22, 2008 with respect to the Provisional Double Patenting rejection have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Claim Objections

2. Claims 12, 18 are objected to because of the following informalities: Please change the "and/or" limitation to "and" in lines 17 and 29 of Claim 12. Please replace the lower case letter "a" with the phrase "an external" in line 1 of Claim 18. All claims that depend from Claims 12 and 18 are objected to for the same reasons set forth above. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had

possession of the claimed invention. Claim 22, which comprises limitations that were not originally claimed, teaches a computer-readable medium. Examiner cannot find any support for a computer-readable medium in Applicants' specification. Examiner also suggests that Applicants' amend the specification with the limitation of Claim 23 since said Claim is an original claim.

Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or show the following limitations:

wherein the broadcast signal is recorded in a recording device installed in an external recording server in response to a request from the mobile terminal device via a mobile communication network accessible to the mobile communication function and a transmitter for transmitting a command signal, to an external recording server, to record a broadcast signal currently being recorded by a recording device installed in the mobile terminal device on the external recording server when the detector detects that the broadcast signal cannot be recorded in the recording device installed in the terminal device.

Claims 1, it's dependent claims with the exception of Claim 22, and Claim 61 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
